

East of England PCC, SiC and Neonatal ODNs Psychological First Aid for Peer Support in Hospitals

Everyone working in the challenging environment of the NHS cares about the psychological welfare of their teams and colleagues. This course will provide delegates with the skills and knowledge to offer practical help and support to individuals and teams who have experienced a traumatic incident or on-going situations in their work and are struggling with their reactions to such events. The course will be very participative, with plenty of opportunity for delegates to share their own experiences and learn from the experiences of others. The course will present practical skills for dealing with a variety of situations and some opportunity will be offered to discuss the use of the skills using case studies in small groups.

We are pleased to announce we will be offering this one day on-line training course for staff in the region at no cost, places are very limited and are offered to those working in a senior decision making role & who are involved in the provision of staff support in their trust. The course is free for attendees, however we reserve the right to make a charge of £50 for non attendance.
