Number of first admissions to NNU (by gestation group)

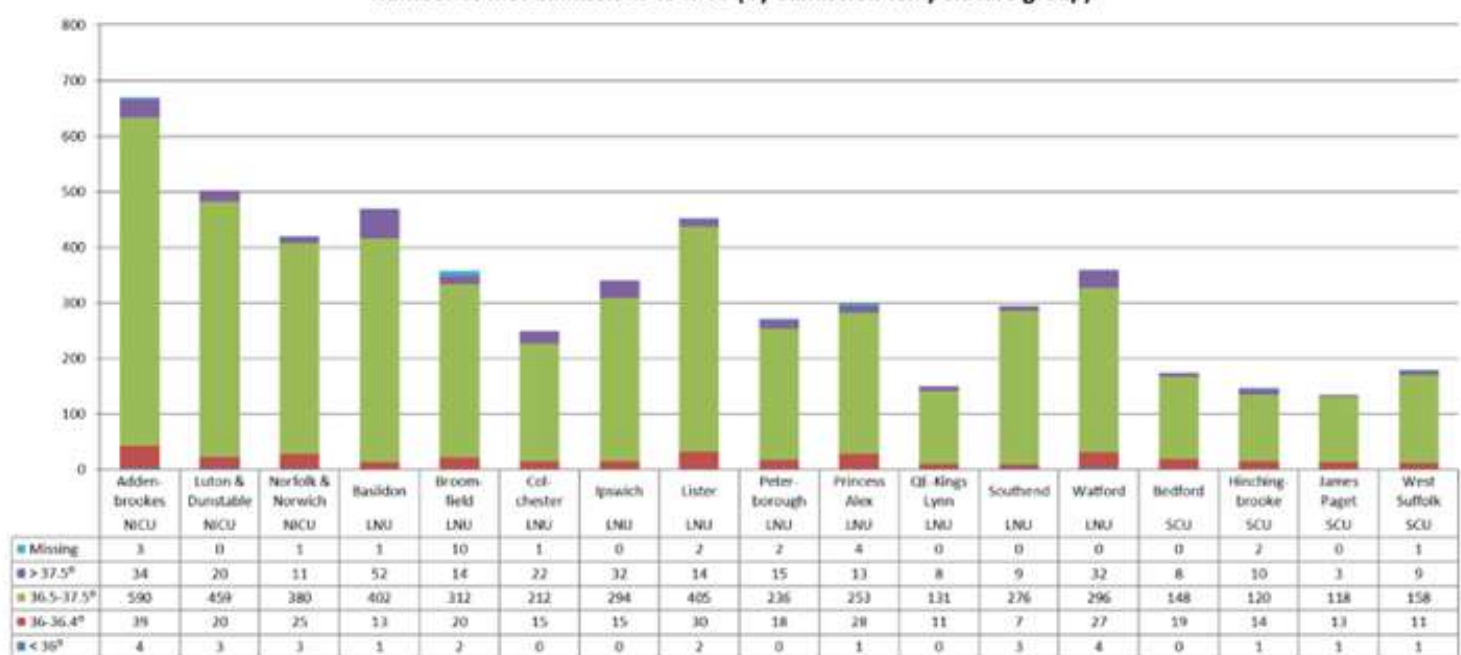

Number of first admissions to NNU (by birth weight group)

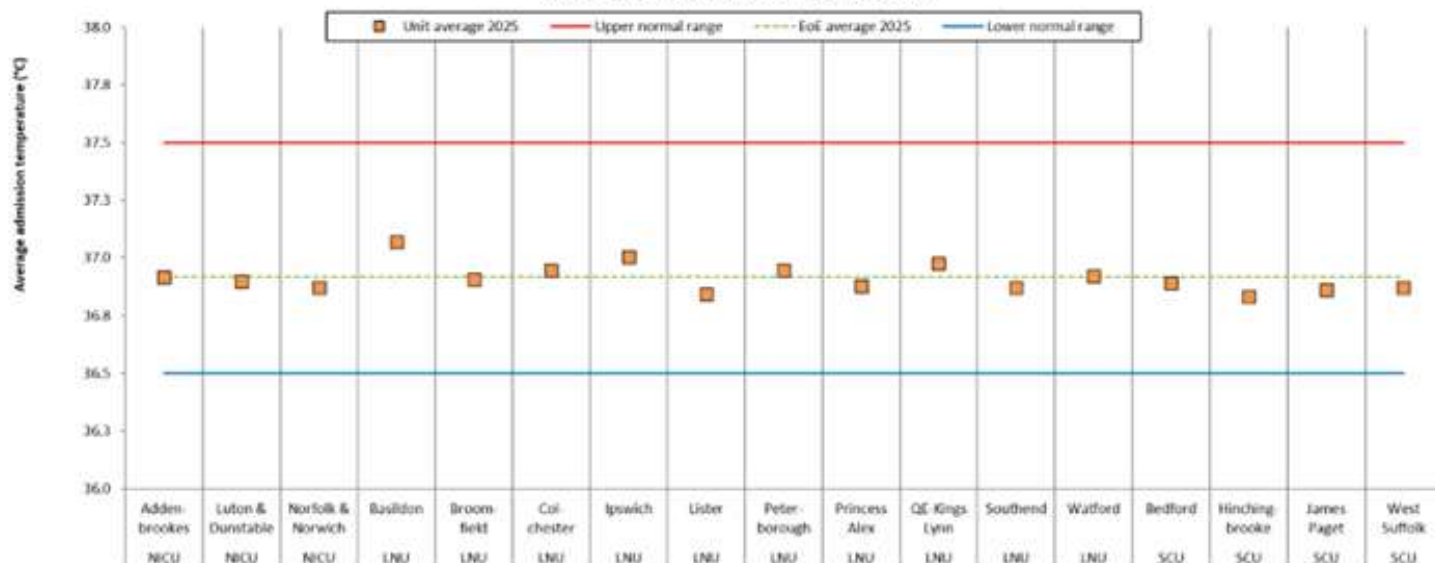

Percentage of term admissions to NNU (by reason for admission)

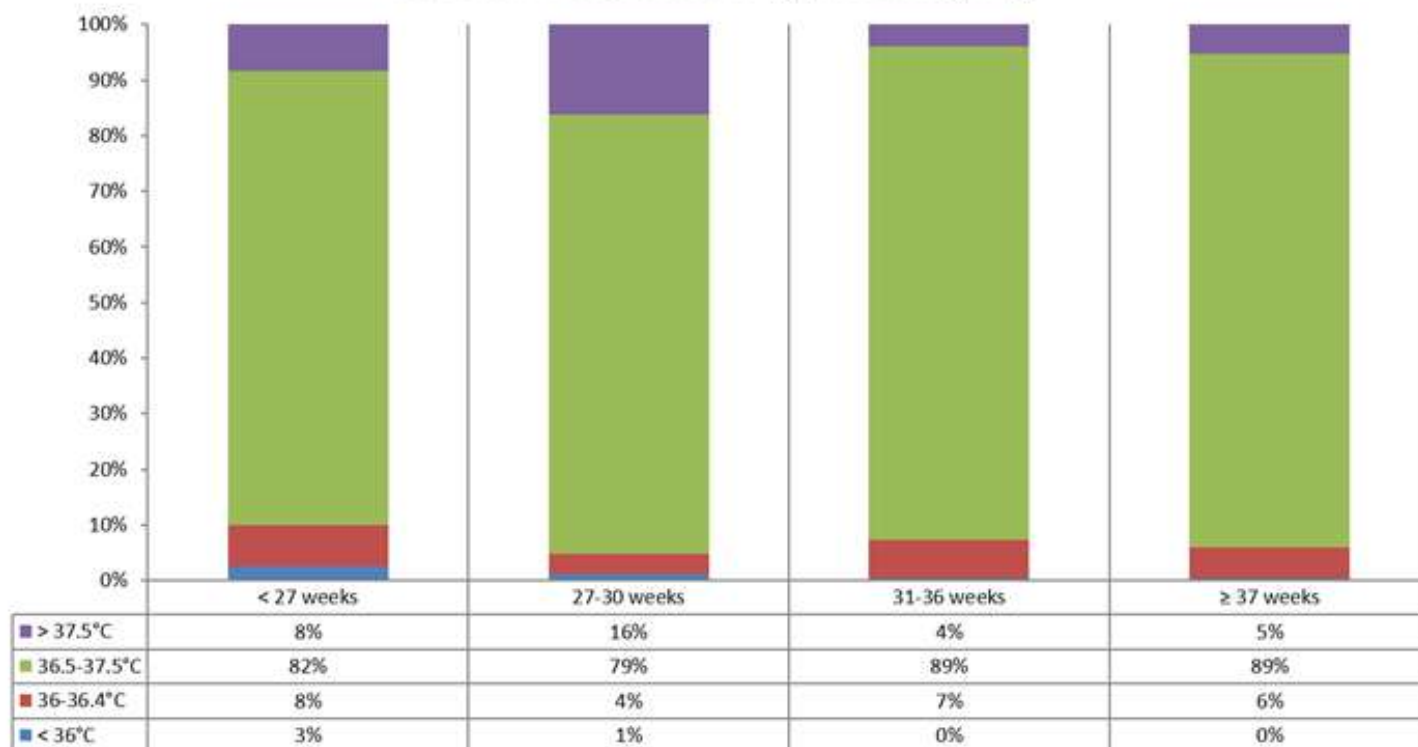

Number of first admissions to NNU (by admission temperature group)

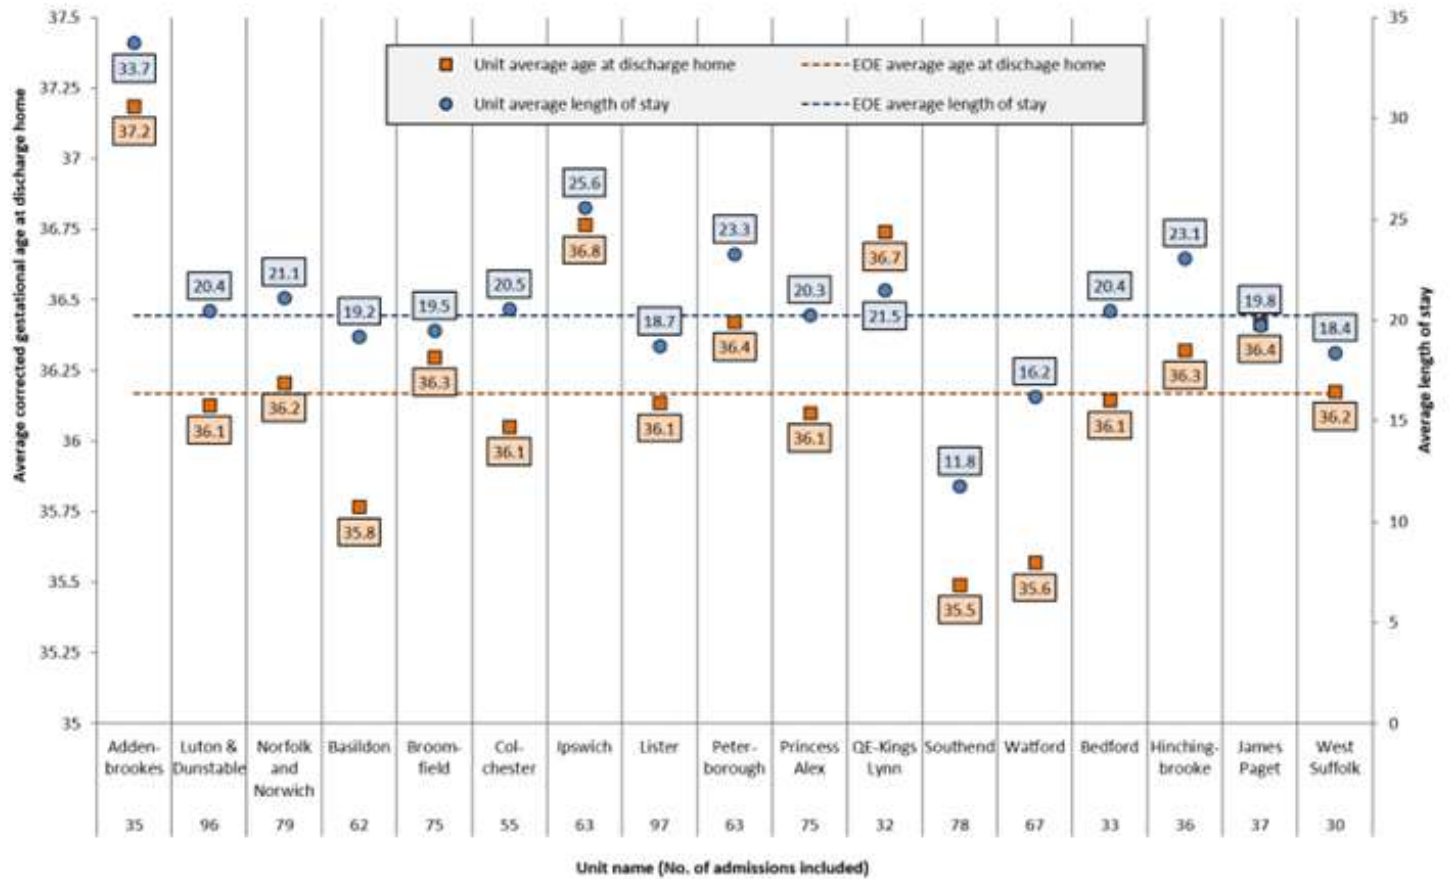

Average admission temperatures

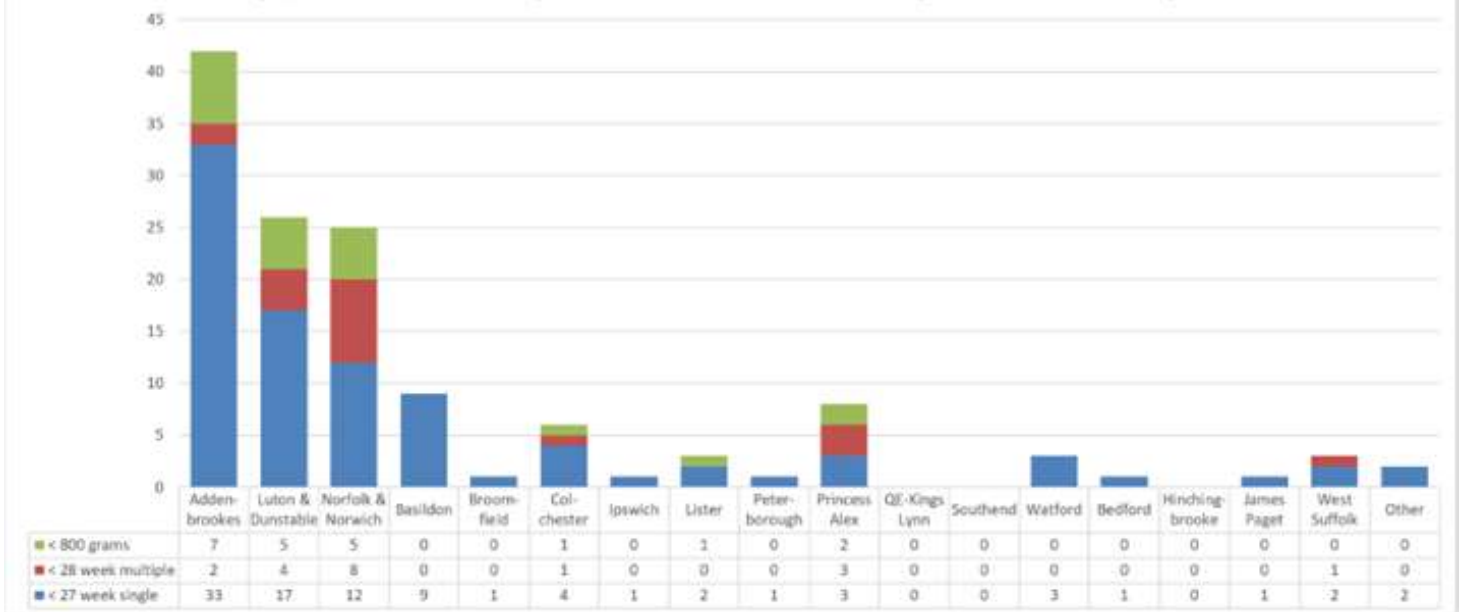

Admission temperatures by gestation group

Average corrected gestational age at discharge and average length of stay for babies born during 2025 at 30-34 weeks gestation and discharged home at the end of their first episode of care

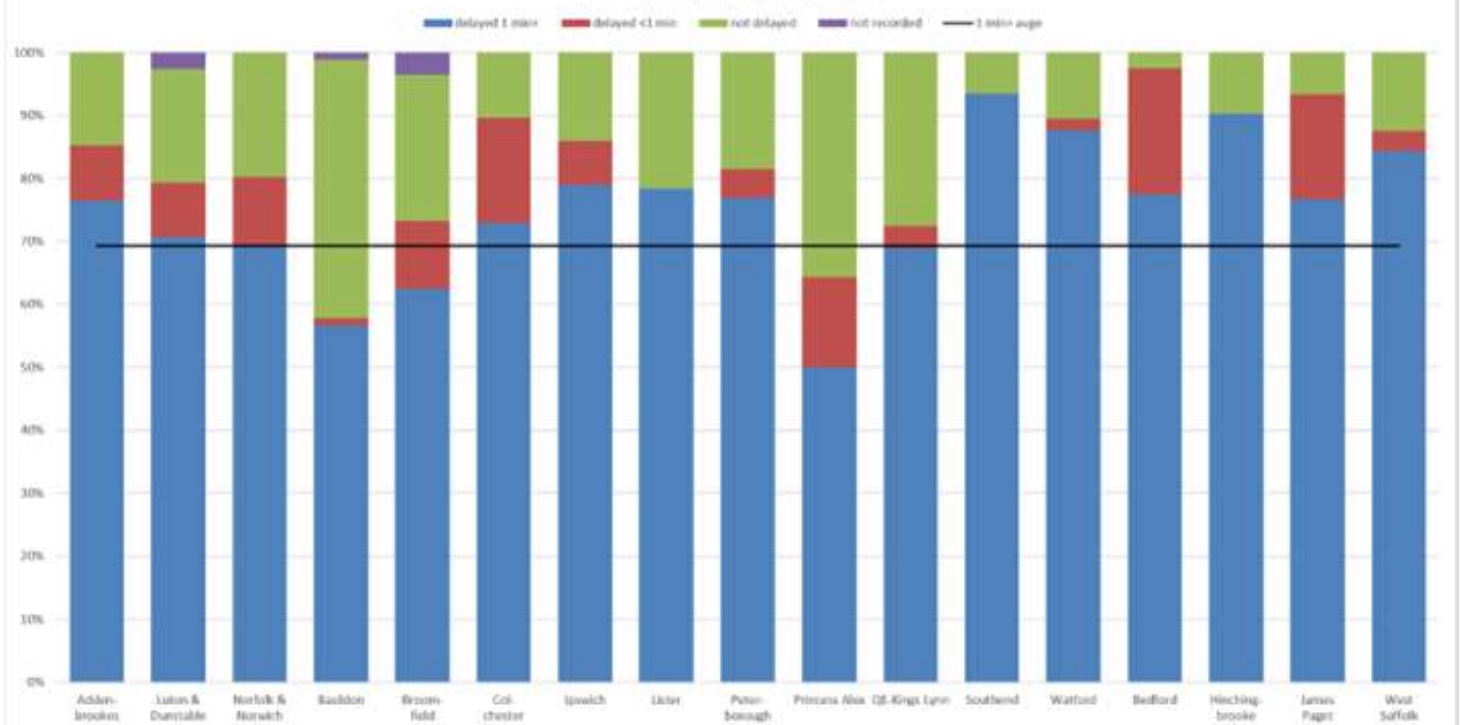

Right place of birth - deliveries during 2025 admitted to Neonatal Unit (<27 week singles, <28 week multiples, <800 grams)

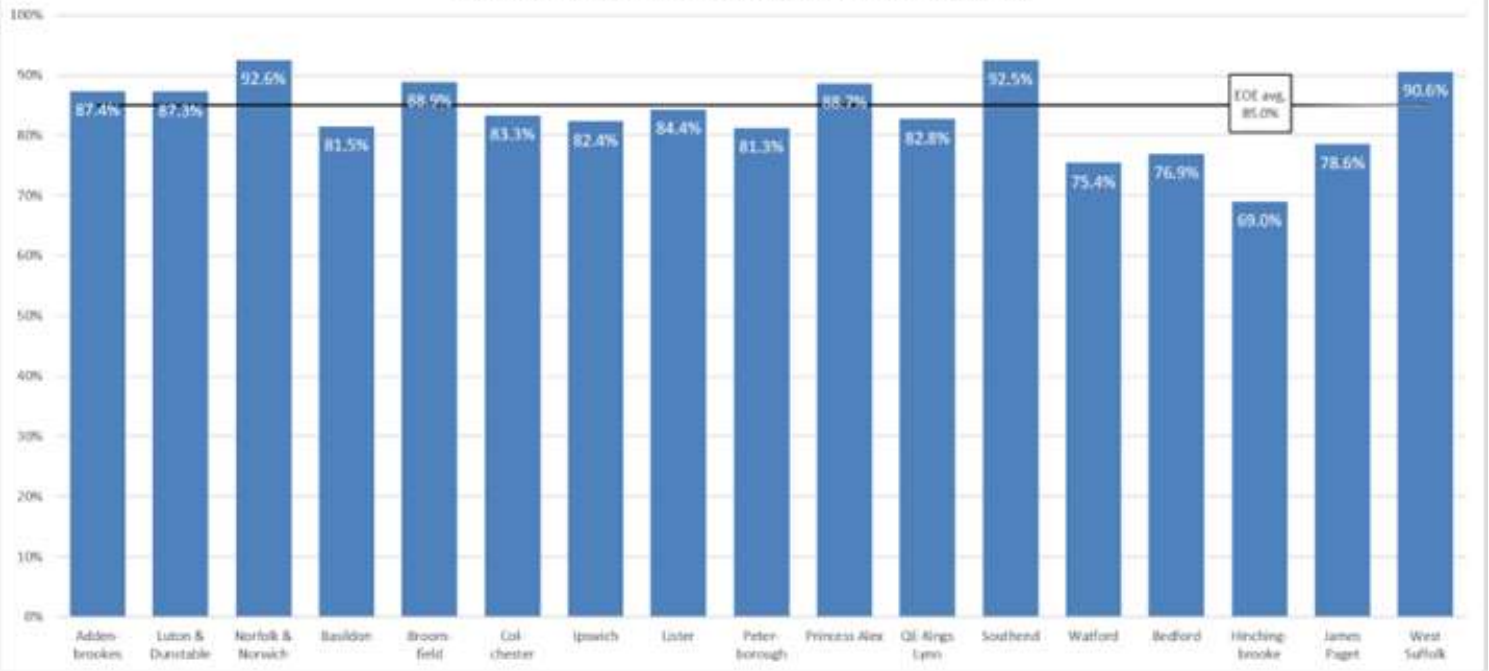

2025 Delayed cord clamping data from BadgerNet

Inclusion criteria: Inborn admissions < 34 weeks

2025 Normothermia data from BadgerNet - Temperature taken within an hour of birth and in normal range
Inclusion criteria: Inborn admissions < 34 weeks, admitted within an hour of birth

2025 breast milk data from BadgerNet - Any breast milk on day 1 or 2 (incl. donor or mouthcare)
Inclusion criteria: First admissions < 34 weeks, admitted within 12 hours of birth, not transferred within 48 hours
